EARLY HALF DOLLARS

1796 15 STARS, CH. AU(55+). Don't let our conservative grade fool you. This is traditionally one of the most overgraded of all U.S. type coins. The present coin is fully prooflike with full denticles and partially raised edges. Attractive violet and gold toning. Exceptionally well struck with 100% full hair detail, stars, wing and tail feathers and eagle's head. Nearly 50% full breast feathers. No adjustment marks probably no actual wear; just the barest traces of friction

in the fields and on the highest points. In our opinion, there are only two real Unc's of this type (and only one of this date) in collectors' or dealers hands. Both coins are in private collections. Of all the so-called proofs and Unc's of this type we've seen offered in the past 5 years, this is the only one we have considered to be even strictly AU! This is easily the finest small eagle half dollar to be offered for sale in the past five years. The dealer we purchased this from graded it Gem Unc and second finest known. We agree with the latter part, and we are proud to offer this coin properly graded as Choice AU. When you see the coin, you will realize that our price is very reasonable. 34,500.00
1806 PT.6, STEM THROUGH CLAW, UNC(60). Attractively toned. A choice coin with gorgeous lustre and even natural toning. Fairly well struck for this notoriously weak issue. No major bagmarks or impairments of any kind. A beautiful coin, worthy of the finest collection. 4,950.00

1900-O CH. BU(60+). Possibly the rarest Barber Half dollar in true mint state. This coin is strictly mint state with full frosty lustre and no serious bagmarks. Some of the stars are flat, as are the eagle's right claws and the lower portion of the arrows. Otherwise this coin is exceptionally well struck for an O mint. The specialist will appreciate this coin, as it is at least 5 to 10 points better than other 1900-O we've ever seen. Sliders have been bringing \$600-\$800 at auctions. THE BEST INVESTMENT

Many people (myself included) believe that investing in rare coins affords them the best possible opportunity to dramatically increase their investment income. Investment income derived from rare coins can be very important to your future as the tax rate for coins held more than six months is usually less than your income tax rate. In other words, it is both easier and more profitable to let your investment work for you.

To say that "purchasing top quality rare coins is the best investment," is a value judgement. However, to state that the average annual gain from uncirculated, early U.S. coins over the last ten years has been superior to all of the traditional avenues of investment, is not a value judgement. It is a demonstrable fact.

As some of you know, I have been a numismatist for 18 years and have had ample opportunity to observe the profit march of uncirculated rare coins. Recently I have been going over some of my records concerning the numismatic portfolios I assembled ten or more years ago. It was interesting to see that the average annual rate of gain for my past clients has exceeded 40% per year. In a number of cases, the annual gain has exceeded 60%. My numismatic research indicates that the average uncirculated (pre 1930) U.S. type coin has experienced 43% annual gain over the last decade. This form of research involves comparisons of catalog price and I fully realize that some of you wish to know what the rate of gain for "real" coins has been. To further illustrate the incredible performance of numismatic investments, I went back to one of my ads which appeared in the February 1966 issue of Numismatic Scrapbook Magazine. I selected a representative sample of the coins advertised then and will now list them in this analysis.

In order to insure my complete objectivity, I have asked the president of our firm, Jim Halperin, to determine the approximate value of each of these coins today, ten years later. In the accompanying chart I have described each coin, listed both the 1966 and 1976 pieces, and determined the actual percentage of increase during this period.

I think you'll agree that the past history of rare coins as an investment is quite impressive. At present it seems to me that this year will either be the best or second best in the recent history of numismatic investing. And the future appears very bright. So bright, in fact, that I have recently decided to triple the amount I spend each month on my own numismatic portfolio. (Yes, I also buy coins from N.E.R.C.G.)

Should you decide to invest in rare coins, I would be pleased to provide you, at no charge, several analyses of the history of numismatic investing excerpted from the manuscript of the book I am writing entitled, "Investing In Rare Coins: Successfully." If you are currently an investor in rare coins, it would very much be in your best interests to allow me to put my 18 years of experience to work for you. I will design a numismatic investing program uniquely suited to your specifications. When joining our investment program there is never any need to give up control of your funds. In fact, I prefer that you exercise as much control over the selections for your investment portfolio as you feel comfortable with. We assure you that the coins you select will be of the same quality as those which have averaged more than 40% actual gain per year over the last decade. No honest person can promise that you'll earn a certain rate of return on your investment, but I can say that I will do anything, within reason, to insure that your investment experience will be as secure, profitable and pleasurable as possible. No one can do more for you than this.

Sincerely

Edward C. Lee, M.Ed.
